## A new initiative of BMH Lost and Found

Many of you might have noticed that school had purchased a storage display unit for BMH Lost and Found, which now looks smart and tidy. If clothes have been unclaimed for one month, we assume they are unclaimed items. As part of BMH Service Team initiative, our Service Team students would like to clean and tidy up those unwanted items and donate to the community charity organisation for children in need. Please check Lost and Found regularly.

## RAMPS on the way

Currently our academic faculty and SLT leadership members are engaged in a programme called RAMPS, on the purpose of reviewing all students on an individual basis. The programme is tailored to focus on analysing students' current situation, particularly in academic achievements, social and emotional wellbeing. And we gather data and feedback from class teachers, math teachers then make the strategic plan using personalized strategies and resources to raise outcome and support progress.

## VGCC Summer Camp@BMH

We are delighted to welcome VGCC to offer BMH students a STEM focused Summer Camp in August 2019, following on from the great success we had with this programme last year. NASA-educators are flown in from the USA and work alongside innovative university interns to bring bilingualism to the classrooms, and provide opportunities for our BMH students to engage in exciting and dynamic projects related to STEM. A Coffee Morning session will be held on April 11th to share more information with interested parents and one free trial lesson for students may be arranged following this session so students can get a taste of the Summer Camp before signing up.

## BMH Service Team Announcement

After the first round of Service Team Lunches, Ms. Packman and Ms. Winnie have collected many brilliant ideas from Service Team students about how to make our school a better place. In order to achieve that, Ms. Winnie and Ms. May now meet Service Team students on a weekly basis to shoot short videos, highlighting inappropriate behaviour noticed by the Team. Service Team students are so devoted to acting out those inappropriate behaviours then correct and value the behaviors we want to see. The final video are shared with students on Prep Monday Assembly. We hope the power of Students' Voice will be spread over our campus to cultivate the value of service.

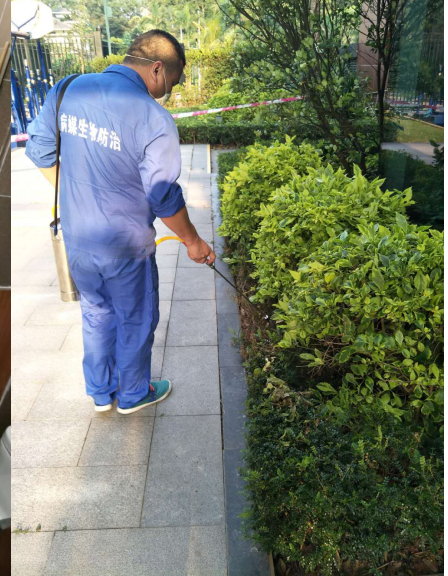

## Safe Campus

Bromsgrove School Mission Hills has always made security and safety a top priority. Following the fire evacuation drill in the beginning of this term, we invited SWAT from Niuhu Police Station to give professional trainings and a demo antiterrorism operation to our school Security Team.

At 4 pm on Wednesday 27th of March, SWAT came to our school and briefed our Security Team on focuses and difficulties of school security and safety work. After that, they trained our security team on antiriot and antiterrorism skills and techniques, as well as using special gear to protect our school. At last, we co-conducted an antiterrorism drill with SWAT on campus, which was brief but fruitful.

SWAT has highly appraised our school on community security and safety as well as the competency of our Security Team. BMH will continue to spare no efforts to safeguard our community.

## Pre School Display

The school places a strong importance of the quality of our displays. Well thought out displays are a part of a lively, stimulating, exciting environment in which students can learn effectively and celebrate their achievements. Teaching, administration and children are involved in the production of our display boards. Please encourage your child to be mindful with how they interact with our beautiful displays to prevent any damage to the display.

## Care for Students' Health

Children's healthy growth has always been the common aspiration of both Pre School and Parents. As the temperature is rising, we are now coming into the high risk of flu season. As such, Pre School has put yet more efforts in health checking and taken precautions as needed.

Pre School has hired experts to conduct campus pest control and disinfection on regular basis. In addition, Class Assistants and school cleaners are also required to make classroom cleaning more of a priority, using separate and clearly marked cleaning tools. We would like to invite parents to join us in creating a healthy community for our children to thrive: please help your kid to do morning check; keep a close eye on your children's physical condition, and feedback to teachers or school doctor promptly if you have any concern.

## Upcoming Events

Events: Coffee Morning

Date: 4th of April

Time: 8:45am-9:45am

Theme: Pre School "Math at Home"

Events: VGCC Summer Camp Info Session

Date: 11th of April

Time: 8:45am-9:45am

Theme: STEM Focused Summer Camp
